\* Airbag Notice: The 2007 Tundra features a driver & front passenger airbag Supplemental Restraint System (SRS) which activates only in a full frontal collision of sufficient magnitude to inflate the bags. In moderate frontal collisions, the airbags may not inflate, in a rear or side collision the airbags are designed not to inflate, so the primary protection is provided by the lap and shoulder belt system. The 2007 Tundra features a front seat-mounted side airbag Supplemental Restraint System (SRS) and a roll-sensing front & rear head/side curtain airbag Supplemental Restraint System (SRS) which activate only in a side-impact collision of sufficient magnitude to inflate the bags. Roll-sensing airbags are designed to deploy at severe tilt degree roll or lateral G-force. Seatbelts must be worn at all times by all occupants.

\* Airbag Notice: The 2007 Tundra features a driver & front passenger airbag Supplemental Restraint System (SRS) which activates only in a full frontal collision of sufficient magnitude to inflate the bags. In moderate frontal collisions, the airbags may not inflate, in a rear or side collision of softcom magnitude to make the bags, in moderate home collision, me analogs the lap and shoulder belt system. The 2007 Tundra features a front seat-mounted side airbag Supplemental Restraint System (SRS) and a roll-sensing front & rear head/side curtain airbag Supplemental Restraint System (SRS) which activate only in a side-impact collision of sufficient magnitude to inflate the bags. Roll-sensing airbags are designed to deploy at severe tilt degree roll or lateral G-force. Seatbelts must be worn at all times by all occupants.
