Safety and Performance Features

- Antilock Braking System with Electronic Brake-force Distribution and Brake Assist.
- Vehicle Stability Control, Traction Control System.
- 2WD Front Engine/Front Wheel Drive, 4WD Active Toraue Control.
- Hill-Start Assist Control and Downhill Assist Control (V6 models only).
- Dual-stage driver and front passenger airbags, front seat-mounted side airbags, roll-sensing front and rear head/side curtain airbags Supplemental Restraint System.1
- Front passenger airbag occupancy classification indicator.
- All-position 3-point lap and shoulder belts.
- Front seatbelt pre-tensioners with force limiters.
- Anchor points for child restraint seats.
- Active front headrests with whiplash protection.

RAV4 power is generated by either a 179 hp 2.5-litre 4-cylinder engine or the powerful 269 hp 3.5-litre V6. Both engines are Dual VVT-i with sequential multiport electronic fuel injection.

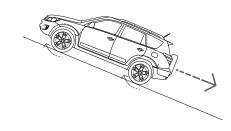

DOWNHILL ASSIST CONTROL Available DAC sets a target speed of approximately 6-9 km/h on steep declines. The system applies the brakes, helping eliminate wheel-locking for a more controlled descent.

TRACTION CONTROL If a wheel loses traction, TRAC

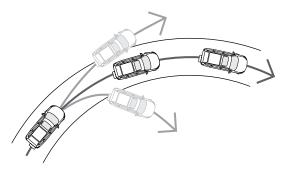

limits engine output and/or applies the brake to the

spinning wheel, and transfers torque to the wheel

that's still got traction.

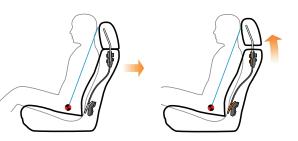

HILL START ASSIST CONTROL Available HAC helps ensure a smooth start on inclines, braking for 2-3 seconds to help prevent vehicle rollback as the driver switches from the brake pedal to the accelerator.

ENHANCED VEHICLE STABILITY CONTROL To help improve control in situations that could cause a vehicle to slip sideways while cornering, RAV4 uses Enhanced VSC. It adjusts engine power, braking and steering assist torque to help the driver steer in the direction that provides the greatest control.

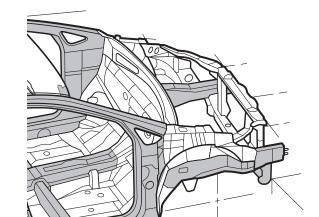

ACTIVE FRONT HEADREST In the event of certain rear-end collisions, a mechanism in the lumbar region of the front seats triggers the movement of the headrests up and forward to help position the headrests to better support the occupant's head.

Quality is built right into the production process from the selection of raw materials, right down to the vehicle's final inspection. And it is the responsibility of everyone to ensure the highest quality possible on each and every vehicle. It's through Toyota's philosophy of 'Kaizen' that we are always looking for ways to continually improve. That's how we make things better.

THE TOYOTA PRODUCTION

PROCESS is one that is constantly evolving. With our "Just-In-Time" practice, the goal is to make certain that during the manufacturing process, only what is needed gets produced. The result is twofold: because there's no excess supply, any issues are exposed and promptly resolved to ensure that everything off of the Toyota assembly line is of exceptional quality.

throughout the long winter months.

Toyota Quality

THE HUMAN TOUCH. As impressive as the machinery is, the achievement of perfect fit and finish is also the result of continuous human touch for every step of the way.

TOYOTA CANADA COLD RESEARCH CENTRE.

Located in Timmins, Ontario, our teams test Toyota vehicles in actual Canadian winter conditions at our cold weather testing track to ensure that they remain dependable

New vehicle warranty summary

NO DEDUCTIBLES – NO TRANSFER FEES

COMPREHENSIVE COVERAGE - 3 YEARS OR 60,000 KM This warranty includes 24 hour Roadside Assistance and other benefits, as well as coverage of repairs on any part of the vehicle that is defective in material or workmanship under normal use and maintenance. Different warranties apply to original tires.

POWERTRAIN COMPONENTS – 5 YEARS OR 100,000 KM This warranty covers repairs to powertrain components that are defective in material or workmanship under normal use and maintenance.

MAJOR EMISSION CONTROL COMPONENTS - 8 YEARS OR 130.000 KM This warrantu covers repairs to specified major emission components that are defective in material or workmanship under normal use and maintenance.

CORROSION PERFORATION - 5 YEARS UNLIMITED DISTANCE Any sheet metal found, under normal use, to have developed a perforation from corrosion due to defects in material or workmanship.

¹All Toyota vehicles shown in this brochure, have Supplemental Restraint Systems (SRS) which, depending on the model, may include driver and front passenger airbags, a driver's knee airbag, front seat-mounted side airbags or side curtain airbags. For important safety information about the Supplemental Restraint System in a vehicle, please see the Owner's Manual or contact your local Toyota Dealer.

² These estimates are based on the Government of Canada's approved criteria and testing methods. The actual fuel consumption of this vehicle may vary. Refer to the Government of Canada publication EnerGuide Fuel Consumption Guide.

³Payload = Passengers, Equipment, Luggage and Cargo. ⁴Toyota tests certain phones for compatibility with Bluetooth technology. Some vehicles equipped with Bluetooth technology are available with bilingual capability. Note that the recommendation of Toyota is not a warranty of the performance for any phone and that some problems may occur with any type of handset based on the service coverage available in your area. Please see your Toyota Dealer for details.

⁵The Toyota DVD based Navigation system is designed to assist in locating an address or point of interest. Discrepancies may be encountered between the system and your actual location. Changes in street names, road closures, traffic flow or other road system changes may affect the accuracy of the mapping software. Rely on your common sense to decide whether or not to follow a specified route. Detailed coverage is not available in every city. Optional periodic geographic updates are available at an additional cost. The Navigational systems in some vehicles are available with bilingual capability. Please see your Navigation system Owner's Manual and your Toyota Dealer for further details.

⁶Toyota Canada is proud to say that all Toyota vehicles built in Canada are made from Canadian and imported parts.
