MAJOR EMISSION CONTROL COMPONENTS

NEW VEHICLE WARRANTY SUMMARY

This warranty includes 24 hour Roadside Assistance and other

that is defective in material or workmanship under normal use

and maintenance. Different warranties apply to original tires.

This warranty covers repairs to powertrain components that

are defective in material or workmanship under normal use

benefits, as well as coverage of repairs on any part of the vehicle

- No deductibles - no transfer fees **COMPREHENSIVE COVERAGE**

POWERTRAIN COMPONENTS

8 YEARS OR 130,000 KM.

and maintenance.

5 YEARS OR 100,000 KM.

3 YEARS OR 60,000 KM.

This warranty covers repairs to specified major emission components that are defective in material or workmanship under normal use and maintenance.

CORROSION PERFORATION

5 YEARS/UNLIMITED DISTANCE.

This warranty covers any sheet metal found, under normal use, to have developed a perforation from corrosion due to defects in material or workmanship

HYBRID-RELATED COMPONENTS*

8 YEARS OR 160 000 KM

This warranty covers repairs to hybrid-related components that are defective in material or workmanship under normal use and maintenance.

*Includes: HV Battery, Battery Control Module, Hybrid Control Module and Inverter with Converter.

TEST DRIVE AND EARN AEROPLAN® MILES TODAY

You can earn Aeroplan®16 Miles when you purchase, test drive, or service your vehicle at a Toyota Dealership.

Speak to your Dealer for full details

Details on the above features can be found in the Owner's Manual or contact your local Toyota Dealer.

battery output. (16) *Aeroplan and the Aeroplan logo are registered trademarks of Aimia Canada Inc.

Toyota Canada Inc. Every effort has been made to ensure the specifications and equipment shown are accurate based on information available at time of printing. In some cases, certain changes in production capacity, standard equipment, options or product delays may occur which would not be reflected in this brochure. Toyota Canada Inc. reserves the right to make these changes without notice or obligation. The Toyota website toyota.ca - or your Toyota Dealer is your best source for up-to-date information.

(1) All Toyota vehicles shown in this brochure have Supplemental Restraint Systems (SRS). For important safety information about the

efficiency estimates were determined using approved Government of Canada Test Methods. Actual fuel consumption will vary based

on driving habits and other factors. (3) Do not use the hands-free phone system if it will distract you. A compatible Bluetooth®-enabled

phone must first be paired. Phone performance depends upon software, coverage and carrier. (4) Driving while distracted can result in loss of vehicle control. Always drive safely, obey traffic laws and focus on the road and traffic conditions while driving. (5) Availability and

accuracy of the information provided by the navigation system is dependent upon many factors. Use common sense when relying on information provided. Services and programming subject to change. Services not available in every city or roadway; updates may be available at an additional cost from your Dealer. Please see your Navigation System Owner's Manual and your Toyota Dealer for further

details. (6) Vehicle Stability Control (VSC) is an electronic system designed to help the driver maintain vehicle control under adverse

and tire and road conditions. (8) Smart Stop Technology operates only in the event of certain simultaneous brake and gas pedal

conditions. It is not a substitute for safe driving practices. Factors including speed, road conditions and driver steering input can all affect whether VSC will be effective in preventing a loss of control. (7) Brake Assist is designed to help the driver take full advantage of the

benefits of ABS. It is not a substitute for safe driving practices. Braking effectiveness also depends on proper brake-system maintenance

applications. When engaged, the system will reduce engine power to help the brakes bring the vehicle to a stop. Factors including speed,

road conditions, and driver input can all impact stopping distance. Smart Stop Technology is not a substitute for safe and attentive driving

and does not quarantee instant stopping. (9) The Pre-Collision System is designed to help reduce the crash speed and damage in certain

frontal collisions only. It is not a collision-avoidance system or a substitute for safe and attentive driving. (10) Lane Departure Alert is not

a collision-avoidance system or a substitute for safe and attentive driving. (11) Dynamic Radar Cruise Control is not a collision-avoidance

system or a substitute for safe and attentive driving practices. (12) Automatic High Beam system operates at speeds above 40 km/h.

. Situations such as a dirty windshield, variable weather, lighting conditions and hilly terrain will limit effectiveness, requiring the driver

to manually turn it off. (13) HAC is designed to help minimize backward rolling on steep ascents. This system is not a substitute for safe

driving judgment and practices. Factors including speed, grade, surface conditions and driver input can all affect whether HAC will be effective in preventing a loss of control. Please see your Owner's Manual for further details. (14) Based on IHS Automotive: Polk Canadian

vehicles in operation and new registrations MY 1996-2015 as of June 30, 2015. (15) The maximum output indicates engine plus HV

Supplemental Restraint System in a particular vehicle, please see the Owner's Manual or contact your local Toyota Dealer. (2) Fuel
