## New vehicle warranty summary – No deductibles – no transfer fees

**COMPREHENSIVE COVERAGE** 3 years or 60,000 km. This warranty includes 24 hour Roadside Assistance and other benefits, as well as coverage of repairs on any part of the vehicle that is defective in material or workmanship under normal use and maintenance. Different warranties apply to original tires.

**POWERTRAIN COMPONENTS** 5 years or 100,000 km. This warranty covers repairs to powertrain components that are defective in material or workmanship under normal use and maintenance.

**MAJOR EMISSION CONTROL COMPONENTS** 8 years or 130,000 km. This warranty covers repairs to specified major emission components that are defective in material or workmanship under normal use and maintenance.

**CORROSION PERFORATION** 5 years/unlimited distance. This warranty covers any sheet metal found, under normal use, to have developed a perforation from corrosion due to defects in material or workmanship.

**HYBRID-RELATED COMPONENTS\*\*** 8 years or 160,000 km. This warranty covers repairs to hybrid-related components that are defective in material or workmanship under normal use and maintenance.

\*\*Includes: HV Battery, Battery Control Module, Hybrid Control Module and Inverter with Converter.

**Toyota Canada Inc.** Every effort has been made to ensure the specifications and equipment shown are accurate based on information available at time of printing. In some cases, certain changes in production capacity, standard equipment, options or product delays may occur which would not be reflected in this brochure. Toyota Canada Inc. reserves the right to make these changes without notice or obligation. The Toyota website [toyota.ca](http://toyota.ca) - or your Toyota Dealer is your best source for up-to-date information.

(1) All Toyota vehicles shown in this brochure have Supplemental Restraint Systems (SRS). For important safety information about the Supplemental Restraint System in a particular vehicle, please see the Owner's Manual or contact your local Toyota Dealer. (2) Fuel efficiency estimates were determined using approved Government of Canada Test Methods. Actual fuel consumption will vary based on driving habits and other factors. (3) Toyota tests certain Bluetooth® capable phones for compatibility with Toyota vehicles. Note that the recommendation of Toyota is not a warranty of the performance for any phone and that some problems may occur with any type of handset based on the phone software version or the service coverage available in your area. Some vehicles equipped with Bluetooth® technology are available with bilingual compatibility. Please see your Toyota Dealer for details. (4) Driving while distracted can result in loss of vehicle control. Always drive safely, obey traffic laws and focus on the road and traffic conditions while driving. (5) The Toyota Navigation System is designed to assist in locating an address or point of interest. Discrepancies may be encountered between the system and your actual location. Rely on your common sense to decide whether or not to follow a specified route. Detailed coverage is not available for every city or roadway. Optional periodic geographic updates are available at an additional cost. The Navigational systems in some vehicles are available with bilingual capability. Please see your Navigation System Owner's Manual and your Toyota Dealer for further details. (6) Vehicle Stability Control (VSC) is an electronic system designed to help the driver maintain vehicle control under adverse conditions. It is not a substitute for safe driving practices. Factors including speed, road conditions and driver steering input can all affect whether VSC will be effective in preventing a loss of control. Please see your Owner's Manual for further details. (7) Brake Assist is designed to help the driver take full advantage of the benefits of ABS. It is not a substitute for safe driving practices. Braking effectiveness also depends on proper brake-system maintenance and tire and road conditions. (8) Smart Stop Technology operates only in the event of certain simultaneous brake and gas pedal applications. When engaged, the system will reduce engine power to help the brakes bring the vehicle to a stop. Factors including speed, road conditions, driver input can all impact stopping distance. Smart Stop Technology is not a substitute for safe and attentive driving and does not guarantee instant stopping. Please see your Owner's Manual for further details. (9) The maximum output indicates engine plus HV battery output. (10) Compared against similarly equipped conventional gasoline powered vehicles. Based on North American sales data and Federal Tier 2 engine emission requirements. (11) Do not rely exclusively on the Blind Spot Monitor System to determine if a lane change is safe. Always look over your shoulder and use your turn signal before changing lanes. There are several limitations to the function, detection, range and clarity of the monitor. For a complete list of limitations and directions regarding use of the monitor system, please see your Owner's Manual. (12) Do not rely exclusively on the Rear Cross-Traffic Alert System. There are limitations to the function, detection and range of the system. You should also look around outside your vehicle, over your shoulder and use your mirrors to confirm rearward clearance. For a complete list of limitations and directions, please see your Owner's Manual. (13) Lane Departure Alert is designed to read the lane markers of certain roads. If the vehicle approaches the outer limits of its lane, the system warns the driver that corrective action may be required. It is not a collision-avoidance system and is not a substitute for safe and attentive driving. System effectiveness depends on many factors. Please see your Owner's Manual for further information. (14) Dynamic Radar Cruise Control was designed to assist the driver and is not a substitute for safe and attentive driving practices. (15) The Pre-Collision System is designed to help reduce the crash speed and damage in certain frontal collisions only. It is not a collision-avoidance system and is not a substitute for safe and attentive driving. System effectiveness depends on many factors, such as speed, driver input and road conditions. Please see your Owner's Manual for further information.

# Committed to Canadians, today and tomorrow.

Being a leader in the automotive industry does not simply start and finish with making great vehicles. It also means being a leader in the community. Toyota Canada and its dealerships across the country fund non-profit programs that work to make a difference for Canadians through direct community involvement.

As part of our ongoing commitment to the environment and education, we established the Toyota Evergreen Learning Grounds program. This program is designed to transform Canadian school grounds into natural learning environments so that students can have a healthy place to play, learn and develop a genuine respect for nature. We also support Special Olympics Canada, which helps athletes reach their full potential through participation in events from a local to a national level.

Visit us at [toyota.ca](http://toyota.ca) to learn more about our programs and commitment to build a better tomorrow for Canadian communities – today.
