THE 2021 GR SUPRA

The evolution of a legend.

Our passion for sports cars runs deep.

Toyota has been racing since 1957, and we have been making sports cars for the road since 1962. Racing is in our DNA, and with each new generation of automobile, this genetic code continues to evolve. It becomes stronger. More focused. And it forms the foundation of our purest sports car yet: the 2021 Toyota GR Supra – it’s an expression of beauty and pure performance, designed to make driver, car and road perform as one. And as the first Toyota to earn the “GR” badge – signifying it’s been track-tested and fine-tuned by Toyota’s GAZOO Racing, the 2021 GR Supra is ready to show purist what a true sport car is really capable of.

2021 GR SUPRA

MOTORSPORT HERITAGE

Shaped by emotion... and racing.

The story of Supra.

Toyota's iconic motorsports heritage lives on with the 2021 GR Supra. Its bold and powerful design, inline-six up front, Rear-Wheel Drive and a modern chassis echoes its rich lineage that include the fourth-generation Supra (1993-2002), the landmark 1967 Toyota 2000 GT, and the 2014 Toyota FT-1 concept vehicle.

MOTORSPORT HERITAGE

Toyota GAZOO Racing.

Pushing every limit.

Passion fuels innovation, and it's our passion for motorsport that fuels GAZOO Racing – Toyota's global in-house racing division. Racing gives us the opportunity to challenge ourselves, to find what works, and fix what doesn't. Collectively we grow through every turn of the wrench and every turn of the wheel. This dedication to growth has helped us earn wins in the FIA World Rally Championship, class wins in the ultra-punishing Dakar Rally, and back-to-back wins at Le Mans. And in 2020, GR Supra and Toyota Gazoo Racing will take on the world's best in GT4 racing and Formula Drift.

PERFORMANCE

Track-ready.

Beautifully engineered.

The 2021 GR Supra is equipped with responsive variable ratio sport-tuned electric power steering, rear adaptive variable sport tuned suspension, and dynamic damper control to provide greater precision handling and control on any road or track. For a fully effortless takeoff, the powerful, yet fuel efficient engine is paired to an eight-speed automatic transmission that delivers uninterrupted, lightning-quick up and down gearshifts.

PERFORMANCE

Pushing the envelope.

Inspired by the past, engineered for the present.

The Supra's lightweight, rigid body is wrapped around a high-performance powertrain for maximum speed and efficiency. This, combined with the improved turbocharged engine rated at 382 horsepower & 369 pound-feet of torque, and a low centre of gravity make it track-ready to put all challengers in the rear-view mirror. More impressive than its full throttle capability is how it gets there. With a mind-bending 0-96 km/h acceleration in 4.1 seconds, it's not only fast but also smooth, thanks to a 3.0 L turbocharged straight-six direct injection engine with variable valve timing.

2021 GR SUPRA

PERFORMANCE

Elevated responsiveness.

SPORT TUNED SUSPENSION

For greater handling, stability, and ride comfort, the GR Supra is equipped with a double-joint spring strut front suspension to provide precise cornering characteristics, while the rigid and lightweight multi-link rear suspension offers improved wheel control.

SPORT MODE

On track days, Sport Mode alters the powertrain for faster gear changes and more dynamic throttle mapping to improve shift crispness and to create a more visceral driving experience.

PADDLE SHIFTERS

The track-inspired paddle shifters deliver real hands-on performance driving, letting you control when you shift and rev matching seamlessly.

LIMITED SLIP ACTIVE DIFFERENTIAL

A limited slip active differential on the rear axle uses an electric motor and multi-plate clutches to minimize understeer and oversteer. It also helps to control lateral torque when cornering – even when accelerating or braking – to enable greater momentum and control.

DESIGN

Form inspired by function.

Artful, athletic design.

A sports car should be captivating, with a design that feels as alluring as it does powerful. Up front, the wide grille channels cool air directly to the turbocharged engine to optimize performance. Up top, the double-bubble roof – a deliberately stylish homage to the Toyota 2000 GT – improves headroom while also reducing drag. Out back, the flared rear spoiler does more than make a dramatic statement – it generates downforce to ground the vehicle during high octane moments.

2021 GR SUPRA

DESIGN

Designed with serious drivers in mind.

Where driver and car become one.

The ultra-modern cockpit features a low, narrow dash to create greater visibility, ideal for precisely placing the car in corners. The small-diameter leather-wrapped steering wheel makes it easy to view critical information on the instrument panel. The centre console was designed with an asymmetrical shape that tightly envelops the driver. Commanding comfort comes from the power adjustable 14-way driver seat with lumbar support that allows you to set your preferred driving position with just the touch of a button. For added support, the premium leather-trimmed sport seats with integrated head restraints and power adjustable side bolsters firmly hold you in place so that you can focus on the open road ahead.

DESIGN

The ultimate thrill ride.

A91 Special Edition.

With only limited quantities available, GR Supra A91 Special Edition is the perfect blend of style and exclusivity with exterior features like matte-black 19" alloy wheels, genuine carbon fiber mirror caps, satin black accent graphics, and a satin black duckbill rear spoiler. On models finished in Nocturnal, the black and blue exterior theme continues on the inside with black leather-trimmed surfaces accented by blue stitching.

An intelligent connection between car and driver.

TOYOTA SUPRA CONNECT¹

From a 24/7 Concierge Agent who can send routes to your navigation system and make restaurant reservations to advanced cellular and GPS technology that can send emergency services to your exact location and attempt to retrieve your vehicle if it is stolen, you can be confident that the GR Supra has you covered.

APPLE CARPLAY™² COMPATIBILITY

The GR Supra is compatible with wireless Apple CarPlay™. CarPlay enables you to easily use your iPhone® features while staying focused on the road ahead. Using your steering wheel controls or Siri®, you can access directions, make calls, send and receive messages and listen to music - all in a way that allows you stay focused on the road.

COLOUR HEAD-UP DISPLAY

The colour Head-Up Display uses aircraft-inspired technology to project important information right on the windshield. This full-colour display can show your speed, give turn-by-turn directions, and much more.

Qi WIRELESS CHARGING

Simply place your Qi compatible device on the available Qi wireless charger for a quick and easy charge.

SAFETY

It's not just the performance that's advanced.

Standard peace of mind.

The 2021 GR Supra offers an advanced suite of innovative safety features that are designed to help protect drivers, passengers, pedestrians, and people in other vehicles from harm. GR Supra is equipped with the latest safety technologies, including Forward Collision Warning,³ Automatic Emergency Braking with Pedestrian Detection, Lane Departure Warning,⁴ Road Sign Assist, Backup Camera, and available features such as Full Speed Dynamic Radar Cruise Control,⁵ Blind Spot Monitor with Rear Cross-Traffic Alert⁶ and Front and Rear Parking Sensors.

(1) Supra Connect services are dependent upon an operative telematics device, a cellular connection, navigation map data and GPS satellite signal reception, all of which can limit system functionality or availability, including access to response center and emergency support. Apps and services subject to change at any time without notice. Terms and conditions of subscription service agreement apply. Data charges may apply. Stolen vehicle police report required to use Stolen Vehicle Recovery. To learn more about Supra Connect services, including data collection, use, sharing and retention, please visit <https://www.supraconnect.ca/app/index.html#/portal>. See Owner's Manual for additional information. Once the trial subscription expires, paid enrollment is required. (2) Apple CarPlay, iPhone and Siri are trademarks of Apple Inc. Once the trial subscription expires, paid enrollment is required. (3) The Front Collision Warning System is designed to help avoid or reduce the crash speed and damage in certain frontal collisions only. It is not a substitute for safe and attentive driving. System effectiveness depends on many factors, such as speed, driver input and road conditions. (4) Lane Departure Warning is designed to read lane markers under certain conditions and provide visual and audible alerts when lane departure is detected. It is not a collision-avoidance system or a substitute for safe and attentive driving. (5) Dynamic Radar Cruise Control is designed to assist the driver and is not a collision-avoidance system or a substitute for safe and attentive driving practices. System effectiveness depends on many factors such as weather, traffic and road conditions. (6) Do not rely exclusively on the Blind Spot Monitor System and Rear Collision Warning System. They are not collision-avoidance systems or substitutes for safe and attentive driving. (7) Brembo® is a registered trademark of Freni Brembo S. P. A. (8) Fuel efficiency estimates were determined using approved Government of Canada Test Methods. Actual fuel consumption will vary based on driving habits and other factors. (9) Not all exterior and interior colour options are available for every model.

Details on the above features can be found in the Owner's Manual or contact your local Toyota Dealer.
