• - Standard • - Optional

*Airbaa Notice: The 2004 4Runner features a driver & front passenaer airbaa Supplemental Restraint System (SRS) which activates only in a full frontal collision of sufficient magnitude to inflate the bags. In moderate frontal collisions, the airbags may not inflate, in a rear or side collision the airbags are designed not to inflate, so the primary protection is provided by the lap and shoulder belt system. The 2004 4Runner Limited features a front seat mounted side airbaa Supplemental Restraint System (SRS) and a front and rear head/side curtain airbaa Supplemental Restraint System (SRS) which activate only in a side-impact collision of sufficient magnitude to inflate the bags. Seatbelts must be worn at all times by all occupants.
